Mobile Printing
From Your iPad®

Canon
CANON GROUP

Work Mobile. Print Mobile.

With the Océ Publisher Mobile App for iPad, your employees can print at any time, via Wi-Fi connection to your network.

How can you make flexible working even easier

You would like to offer your employees flexible working opportunities, including mobile printing. Many office workers with a mobile device cannot use it for printing, although they would like to. Mobile printing should be just as easy as printing from a PC, and it should also occur within the existing IT infrastructure.

Hassle-free printing, on the go

With Océ Publisher Mobile App for iPad, your staff can print directly to an Océ wide format printer - from any location within reach of the Wi-Fi router part of your organization's network. While using their iPad mobile device employees can receive emails and send a print job directly to an Océ wide format printer.

More options for busy professionals

Now your employees can discuss a change, make an annotation, use their iPad mobile device to connect to the cloud and send a print request to an Océ wide format printer via the Océ Publisher Mobile App.

Océ Publisher Mobile is an application that enables you to easily plot from an Océ system with your iPad device. Océ TCS, TDS, Océ ColorWave® and Océ PlotWave® systems are supported. Supported files for printing include PDF, PLT, TIFF and DWF.

Mobile printing offers value and convenience

For your staff mobile printing can be easy and useful. They can print from their iPad mobile device without installing print drivers. No need to take their computers with them when leaving their desks, as they know they can still print documents when necessary. This is also an advantage for the employee who needs to print from different locations within an organization's own campus, facilities, or any other location that has Wi-Fi access to the organization's network.

Océ Publisher Mobile

Print from your iPad

Increased productivity

Mobile printing means fewer delays in document printing. Sometimes it is easier or more comfortable to view information on paper rather than on screen, for example when discussing large format drawings or detailed technical documents. Océ Publisher Mobile App allows your employees to print documents if, and when, they need them.

The advantages of Océ Publisher Mobile App for your organization

- Work more flexibly: print from anywhere within your existing network environment
- Print from iPad mobile devices via a Wi-Fi router
- Work more efficiently
- Have your prints available more quickly

Beyond the Ordinary

**Printing for
Professionals**

Downloading the Océ Publisher Mobile App is easy and free of charge. Open the Apple® Store online on your iPad or in the iTunes® application program and search for "Publisher Mobile" or scan the QR code below.

Creating global leadership in printing

Canon and Océ join forces to create the global leader in the printing industry. For our customers this combines Canon and Océ technology with the support of the Océ direct sales and service organizations. Look to the new Canon-Océ combination for:

- Enterprise printing in the office and corporate printroom
- Large format printing of technical documentation, signage and display graphics
- Production printing for marketing service bureaus and graphic arts
- Business Services for document process outsourcing
